

## **Getting Started with Canvas – Transcript**

Welcome to this video tutorial, Getting Started with Canvas. This tutorial features a playlist of shorter videos that will walk you through some of the basic features of Canvas in order to get you started quickly.

Canvas is the Learning Management System, or LMS, that the University of Oregon uses to support online courses and to help organize and disseminate course materials in face-to-face courses. In the following videos, we will discuss some ways Canvas can support your teaching. We will cover the basics of Dashboard Navigation, Files, Modules, and Pages.

You can watch the videos in any order; however, we suggest starting with the Dashboard Overview.
